KNIGHTS OF THE BATH.

This Order was first instituted at the Coronation of Henry IV. in 1399, since which Time it has been usual for Kings and Queens at their Coronation to create Knights: It was re-established by K. George I. in 1725, and made a military Order for ever for 38 Knights, besides the Sovereign. The Symbol is a Sceptre, three Imperial Crowns, with a Rose and Thistle, in a Circle of Gold, and this Motto, Tria juncta in uno; which Badge, with a Crimson Ribbon, is daily worn by the Knights of this Order.

His Majesty, Sovereign of the Order.

DIRECTIONS how to use the foregoing T A B L E.

THE foregoing Table exhibits at one View, the intrinsic Value *per cent.* of the public Funds, and the Proportion they bear to each other, by which any Person may know which it will be most advantageous to purchase, and what Proportion such Purchase bears to the Value of landed Estates, and Life Annuities.

Explanation of the TABLE.

In the public Papers, I find that Three *per cent.* Annuities, are at $82\frac{1}{2}$, and India Stock at 141.

Query. Which of these will bring me most Interest for Money, and what Interest will each of them produce?

T H E D I R E C T I O N.

To know this, look in the first Column containing Three *per cents* for $82\frac{1}{2}$, and then in Column 9, by which you will find that Three *per cents* at $82\frac{1}{2}$, produce 3*l.* 12*s.* 8*d.* *per Annum.* Then look in Column 7, for India Stock, and you will find 165, which shews, that when Three *per cents*, are at $82\frac{1}{2}$, India Stock is worth 165, in a due Proportion, bringing in the same Annual Interest of 3*l.* 12*s.* 8*d.* So that by the Price in the Papers, *viz.* 141, it appears that India Stock is 24 *per cent.* cheaper than Three *per cents.* at $82\frac{1}{2}$. This Rule so obviously gives the just Value of all the intermediate Funds, that it requires no further Explanation.
